DETAILED ACTION

Election/Restrictions

1. Applicant's election of claims 1-5 and 13-15 in the reply filed on 4/28/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Drawings

2. Figure 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claims 2, 3, and 5 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 09/911,012

Art Unit: 2661

Claim 2 recites the limitation "said step of identifying background noise samples" in line 1. There is insufficient antecedent basis for this limitation in the claim. "wherein said step of identifying background noise samples local to the transmitting terminal and storing the samples in a buffer." is unclear.

Claim 3 recites the limitation "said step of background noise identification" in line

1. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the microphone" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 6. Claims 1-3, 5, and 13-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Romesburg et al (6,163,608).

Regarding claims 1, 2, and 15, Romesburg discloses a method and an apparatus for selectively producing comfort noise comprising circuit for sampling background noise local to the appliance; a comfort buffer for storing the samples of background noise (see abstract; col. 3, lines 42-59; col. 9, lines 11-23); and a switching circuitry for switching

Application/Control Number: 09/911,012

Art Unit: 2661

an output of the comfort noise buffer to an output of the appliance for transmission of the samples of background noise (see switches in figure 2A).

Regarding claim 3, Romesburg discloses the use of voice activity detection (see voice activity detection (VAD) in figure 2A).

Regarding claim 14, Romesburg discloses circuitry for detecting an echo between a microphone and a sound output device of the appliance and causing the switching circuitry to switch in response (see figure 2A; col. 7, lines 8-17).

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 4 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Romesburg in view of Chung et al (2003/0002476).

Regarding claims 4 and 15, Romesburg does not explicitly disclose the protocol is the Internet protocol and the appliance is a personal computer (PC). However, a PC connected to the Internet for VoIP communication is well known in the Art. Chung discloses these features (see terminal 206 in figure 2). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to use a PC to connect to the internet for voice communication as taught by Chung in the system of Romesburg because this is a common practice in the art.

Art Unit: 2661

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Rasmusson et al (5,835,851); Tahernezhaadi et al (6,785,339); Younce et al (5,274,705); Kirla Olli (6,882,711); and Nicol Jordan James (6,882,711).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian D. Nguyen whose telephone number is (571) 272-3084. The examiner can normally be reached on 7:30-6:00 Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chau Nguyen can be reached on (571) 272-3126. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business

Center (EBC) at 866-217-9197 (toll-free).
